§ 76. Standards and procedures; establishment, amendment, and revocation

(a) Authority of Secretary

The Secretary is authorized to investigate the handling, weighing, grading, and transportation of grain and to fix and establish

(1) standards of kind, class, quality, and condition for corn, wheat, rye, oats, barley, flaxseed, sorghum, soybeans, mixed grain, and such other grains as in the judgment of the Secretary the usages of the trade may warrant and permit, and

(2) standards or procedures for accurate weighing and weight certification and controls, including safeguards over equipment calibration and maintenance, for grain shipped in interstate or foreign commerce; and the Secretary is authorized to amend or revoke such standards or procedures whenever the necessities of the trade may require.

(b) Notice and opportunity for comment; standards regarding cleanliness of grain

(1) Before establishing, amending, or revoking any standards under this chapter, the Secretary shall publish notice of the proposals and give interested persons opportunity to submit data, views, and arguments thereon and, upon request, an opportunity to present data, views, and arguments orally in an informal manner. No standards established or amendments or revocations of standards under this chapter shall become effective less than one calendar year after promulgation thereof, unless in the judgment of the Secretary, the public health, interest, or safety require that they become effective sooner.

(2) (A) If the Secretary determines that the establishment or amendment of standards regarding cleanliness conditions of wheat, corn, barley, sorghum and soybeans that meet the requirements for grade number 3 or better (as set forth in subparagraph (B)) would—

(I) enhance the competitiveness of exports of wheat, corn, barley, sorghum and soybeans from the United States with wheat, corn, barley, sorghum and soybean exports marketed by other major exporters;

(II) result in the maintenance or expansion of the United States export market share for wheat, corn, barley, sorghum and soybeans;

(III) result in the maintenance or increase of United States producer income; and

(IV) be in the interest of United States agriculture, taking into consideration technical constraints, economic benefits and costs to producers and industry, price competitiveness, and importer needs;

the Secretary shall establish or amend the standards to include economically and commercially practical levels of cleanliness for wheat, corn, barley, sorghum and soybeans.

(ii) The Secretary shall make a finding under this subsection for grain of the type described in clause (i) as soon as practicable after November 28, 1990.

(B) (i) In establishing requirements for cleanliness characteristics, the Secretary shall—

(I) consider technical constraints, economic benefits and costs to producers and industry, the price competitiveness of United States agricultural production, and levels of cleanliness met by major competing nations that export wheat, corn, barley, sorghum and soybeans;

(II) promulgate regulations after providing for notice and an opportunity for public comment; and
Phase in any requirements for cleanliness characteristics by incrementally decreasing the levels of the objectionable material permitted in shipments of grade number 3 or better wheat, corn, barley, sorghum and soybeans.

(ii) Following the phase-in period referred to in clause (i)(III), subsequent revision of cleanliness requirements shall be conducted consistent with the schedule of the Secretary for reviewing grain standards.

(C) If the Secretary determines to establish requirements for cleanliness characteristics under this section, the Secretary shall ensure that such requirements are fully implemented not later than 6 years after November 28, 1990.

(c) Grade determining factors related to physical soundness and purity; notice and opportunity for comment

(1) In establishing standards under subsection (a) of this section for each grain for which official grades are established, the Secretary shall establish for each such grain official grade-determining factors and factor limits that reflect the levels of soundness and purity that are consistent with end-use performance goals of the major foreign and domestic users of each such grain. Such factors and factor limits for grades number 3 and better shall provide users of such standards the best possible information from which to determine end-use product quality. The Secretary shall establish factors and factor limits that will provide that grain meeting the requirements for grades number 3 and better will perform in accordance with general trade expectations for the predominant uses of such grain.

(2) In establishing factors and factor limits under paragraph (1), the Secretary shall provide for notice and an opportunity for public comment prior to making changes in the grade-determining factors and factor limits that shall be applicable under this section to grain that is officially graded.

(d) Moisture content criterion

If the Government of any country requests that moisture content remain a criterion in the official grade designations of grain, such criterion shall be included in determining the official grade designation of grain shipped to such country.

Amendments

1994—Subsecs. (a) to (c). Pub. L. 103–354 substituted “Secretary” for “Administrator” wherever appearing.

1993—Subsec. (a)(1). Pub. L. 103–156, which directed amendment of “Section 4 (a)(1)” by substituting “the judgment of the Administrator” for “his judgment”, without specifying the name of the Act being amended, was executed to this section, which is section 4 of the United States Grain Standards Act, to reflect the probable intent of Congress.

1968—Pub. L. 90–487 substituted provisions authorizing Secretary to establish, amend, and revoke standards for provisions making the use of official standards compulsory, setting out exceptions, and providing for the right of appeal.

Effective Date of 1977 Amendment

Effective Date of 1976 Amendment
Amendment by Pub. L. 94–582 effective 30 days after Oct. 21, 1976, see section 27 of Pub. L. 94–582, as amended, set out as a note under section 74 of this title.

Effective Date of 1968 Amendment
For effective date of amendment by Pub. L. 90–487, see section 2 of Pub. L. 90–487, set out as a note under section 78 of this title.

Benefits and Costs Associated With Improved Grain Quality
Section 2003 of title XX of Pub. L. 101–624 provided that: “The Administrator of the Federal Grain Inspection Service shall estimate the economic impact, including the benefits and costs and the distribution of such benefits and costs, of any major changes necessary to carry out the amendments made under this title to sections 4 and 13 of the United States Grain Standards Act (7 U.S.C. 76 and 87b) prior to making such changes.”

Revision of Grain Inspection Procedures To Reflect Levels of Insect Infestation
Pub. L. 99–641, title III, § 304, Nov. 10, 1986, 100 Stat. 3565, provided that: “Not later than 6 months after the date of enactment of this Act [Nov. 10, 1986], the Administrator of the Federal Grain Inspection Service shall issue a final rule that revises grain inspection procedures and standards established under the United States Grain Standards Act (7 U.S.C. 71 et seq.) to more accurately reflect levels of insect infestation.”

Study of Uniform End-Use Value Tests for Grain

“(a) Study.—The Secretary of Agriculture shall direct the Federal Grain Inspection Service and the Agricultural Research Service to conduct a study of the need for and availability of uniform end-use value tests for grain. The study shall include the following:

“(1) A survey of domestic and foreign buyers of grain to identify the information about grain characteristics that would be most useful to such buyers. The survey shall take into account those factors that buyers specify in contracts, test for, measure, or would measure if tests were available, including—

“(A) the starch, oil, and protein content, breakage susceptibility, and individual kernel moisture of corn;

“(B) the baking characteristics, protein content, gluten content and quality, and milling hardness of wheat; and

“(C) the protein, oil, and free-fatty-acid content of soybeans.

“(2) A review of the development and availability of tests for the characteristics identified in the survey conducted under paragraph (1), including an evaluation of the costs of providing such tests.

“(b) End-Use Tests.—

“(1) Ongoing review.—The Secretary of Agriculture shall direct the Federal Grain Inspection Service and the Agricultural Research Service to maintain an ongoing review to determine the end-use tests that are of economic value to buyers, and the availability and costs of such tests.

“(2) Revision of procedures.—The Administrator of the Federal Grain Inspection Service, to the extent practicable, shall revise official grain inspection and certification procedures to include within official inspection (as defined in section 3(i) of the United States Grain Standards Act (7 U.S.C. 75 (i))) those tests that are identified under the study conducted under subsection (a) as useful, available, and economically feasible.”

New Grain Classifications
Section 1672 of Pub. L. 99–198 provided that:
“(a) The Secretary of Agriculture shall direct the Federal Grain Inspection Service and the Agricultural Research Service to cooperate in developing new means of establishing grain classifications taking into account characteristics other than those visually evident.

“(b) The Secretary shall report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, semiannually, with the first report due not later than December 31, 1985, on the status of cooperative efforts required under subsection (a), as such efforts relate to more accurately classifying types of wheat and other grains currently in use.”

Investigation and Study Regarding Adequacy of Grain Standards; Changes in Standards; Report to Congress by October 21, 1978

Section 24 of Pub. L. 94–582, which provided for investigation and study by Administrator of the Federal Grain Inspection Service regarding adequacy of grain standards established under this chapter in relation to needs and concerns of domestic and foreign grain buyers, with Administrator, as result of such study, to make necessary changes in grain standards, and to submit report to Congress setting forth findings of study and actions taken as result thereof not later than two years after Oct. 21, 1976, was repealed by Pub. L. 106–472, title I, § 110(b), Nov. 9, 2000, 114 Stat. 2061.
