(2) The Secretary of Defense shall establish a policy to encourage the Secretary of each military department and the head of each Defense Agency to reengineer industrial processes and adopt best-business practices at their Centers of Industrial and Technical Excellence in connection with their core competency requirements, so as to serve as recognized leaders in their core competencies throughout the Department of Defense and in the national technology and industrial base (as defined in section 2500 (1) of this title).

(3) The Secretary of a military department may conduct a pilot program, consistent with applicable requirements of law, to test any practices referred to in paragraph (2) that the Secretary determines could improve the efficiency and effectiveness of operations at Centers of Industrial and Technical Excellence, improve the support provided by the Centers for the armed forces user of the services of the Centers, and enhance readiness by reducing the time that it takes to repair equipment.

(b) Public-Private Partnerships.—
(1) To achieve one or more objectives set forth in paragraph (2), the Secretary designating a Center of Industrial and Technical Excellence under subsection (a) may authorize and encourage the head of the Center to enter into public-private cooperative arrangements (in this section referred to as a “public-private partnership”) to provide for any of the following:

(3) If the Secretary concerned, or the Secretary of Defense in the case of a Defense Agency, authorizes the use of public-private partnerships under this subsection, the Secretary shall submit to Congress a report evaluating the need for loan guarantee authority, similar to the ARMS Initiative loan guarantee program under section 4555 of this title, to facilitate the establishment of public-private partnerships and the achievement of the objectives set forth in paragraph (2).

(c) Private Sector Use of Excess Capacity.— Any facilities or equipment of a Center of Industrial and Technical Excellence made available to private industry may be used to perform maintenance or to produce goods in order to make more efficient and economical use of Government-owned industrial plants and encourage the creation and preservation of jobs to ensure the availability of a workforce with the necessary manufacturing and maintenance skills to meet the needs of the armed forces.
